I bought a modern table at a consignment store in Palm Springs and noticed that the sides were warping and called Mark at Museum Quality to see if it could be fixed. He met me at the consignment store and told me he could fix it. He loaded it in his van and had the table for about 2 weeks. The table had the warping issue as well as some scratches on the high gloss top and 2 small chips on the sides of the table. When I got the table back (he delivered it to me) it looks like a brand new table! He took out all the scratches, and filled in the chips and polished it up beautifully. (we weren't expecting that, we just wanted the sides glued down). Because of the angles of the table gluing the table was a bit of a challenge but Mark figured it out. We are very pleased with the quality of his work and would highly recommend him.
