Dear Mark,

I want to thank you in writing for the wonderful job you did in refinishing my dining room table. I have owned my table for almost 40 years. Through the years many things happened to the table. The top was stained and had a lot of heat (white) marks from hot dishes being put on the table. Also someone had started to refinish one of the table leaves and did not finish the job. The table legs had most of the stain and varnish worn off. This was due to some animals wetting on the legs years ago.

As you can see by the pictures, Mark did a fabulous job in restoring and refinishing the table. He asked that I be present to watch him stain one of the table leaves to be sure he got just the correct color. Then I visited Mark to see the table completely stained before he put the final coats of clear coat on the table. There were several areas on the table where intricate carvings were and he did a great job with those areas.

In the future if I have any needs to have something refinished, Mark will be the only person I would ask to do the job. He is so dedicated, it is as if he is refinishing something for himself.

I would fully recommend Mark for any refinished assignment that someone might have.

Sincerely,

Paul Robie
